

Highest/Lowest Variable Generation Rates Connecticut

Licensed suppliers are required to post the highest and lowest generation service charge rate that was billed to their customers under a Variable rate offer in each of the preceding twelve months.

The following table and graph shows this information for North American Power's 100% Renewable and Standard products:

Highest and Lowest Variable Generation Rate Charged by North American Power Over the Past Twelve Months (Values shown in \$/kWh)												
Month	Jan-22	Feb-22	Mar-22	Apr-22	May-22	Jun-22	Jul-22	Aug-22	Sep-22	Oct-22	Nov-22	Dec-22
Lowest Rate	\$0.1694	\$0.1694	\$0.1694	\$0.1694	\$0.1694	\$0.1694						
Highest Rate	\$0.1699	\$0.1699	\$0.1699	\$0.1699	\$0.1699	\$0.1699						

*Please note that variable pricing for residential customers ended in June 2022, as all residential customers on a variable rate were returned to the applicable utility for Standard Offer service.
